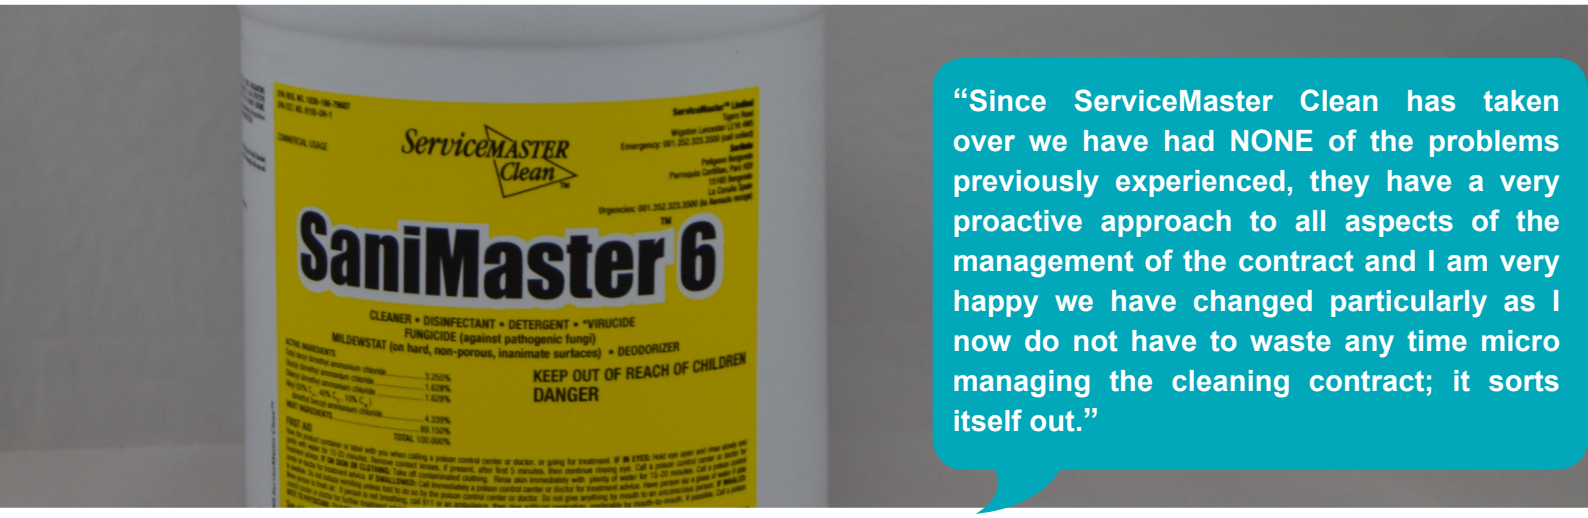
ServiceMASTER Clean®



"Since ServiceMaster Clean has taken over we have had NONE of the problems previously experienced, they have a very proactive approach to all aspects of the management of the contract and I am very happy we have changed particularly as I now do not have to waste any time micro managing the cleaning contract; it sorts itself out."

SaniMaster 6 from ServiceMaster
Effective against enveloped viruses

We understand that many of our businesses, healthcare providers and educational establishments are rightly concerned about removing, reducing or containing the threat of contamination.

ServiceMaster Clean Contract Services are working with our existing clients that have been required to remain open and those that are now re-opening their doors; to help them meet more demanding cleaning & hygiene regimes.

During our cleaning precesses we use SaniMaster 6. SaniMaster 6 is an appropriate and effective sanitising/decontamination product which is widely used within hospitals, food preparation areas, schools etc.

SaniMaster 6 is effective against enveloped viruses.
